

Net Neutrality

Let's don't go back to internet stone age. Let's keep the internet neutral. I am a low income retiree. I am enjoying the business competition between Comcast, Amazon, Hulu, Netflix, and others. All that competition goes away with 17-108. It allows Comcast to throttle the bandwidth of their competitors to "On Demand". Or force their competitors to pay large fees that will raise the price of streaming non-Comcast offered movies. I do not see any benefit to most users, especially to me, by throttling bandwidth of competition.

Comcast must have a large lobbying effort, donating to congressmen campaigns, or FCC folks own a lot of Comcast stock for us to be even considering going back to the internet dark ages.

Thanks for your time.
